

Cochlear™ Wireless Phone Clip

Benefits of your Cochlear™ Wireless Phone Clip

- Enjoy hands-free calling direct to your Baha Sound Processor.
- Hear your Bluetooth®-enabled navigation system directly through your Baha sound processor.
- Discreetly adjust your Baha Sound Processor by using the Phone Clip as a remote control.
- Stream music from a Bluetooth-enabled device.

The Phone Clip can be easily attached to clothing. The built-in microphone will pick up and transmit your voice, even if your phone is several feet away.

Product overview

Getting started

Check with your hearing healthcare professional whether your sound processor has been paired with your Phone Clip. Previously paired sound processors do not need to be paired again. If your sound processor is not pre-paired, see below for instructions on how to easily pair it with your Phone Clip.

Tip! Make sure that your sound processor volume is comfortably adjusted before you change the settings with the volume control on the Phone Clip.

Charging the battery

Plug one end of the included micro-USB charging cable into the Phone Clip and the other into a computer, or into a power outlet via the supplied adapter.

When the red LED indicator on top of the Phone Clip turns green with a red blink every 2 seconds charging is complete.

The first time you charge your Phone Clip allow it to charge for at least 3 hours, even if the indicator light shows a full charge. The battery cannot be overcharged.

Note: The Phone Clip provides 6 hours of talk time or 80 hours of standby time from a full charge.

Light indicators (LED)

The LED indicator at the top of your Phone Clip functions as a multi-purpose user interface, providing information on the status of the device.

Blinks	Meaning
	Normal operation (green)
	Battery low (yellow)
	Charging (red)
	Fully charged – still connected to charger (red/green)
	Ready for pairing with sound processor (yellow)
	Ready for pairing with Bluetooth device (blue)
	Bluetooth call active (blue)

Connecting with your mobile phone

To receive or place phone calls with the Phone Clip, the Bluetooth® functionality must be activated in your mobile phone. Your phone might ask you to confirm whether you would like to connect with the Phone Clip after it is successfully paired.

If you have to connect manually, locate a list of “Paired Devices” in your phone’s Bluetooth menu. From this list, highlight “Hearing Aid Phone” and select “Connect.”

You are now ready to use your Phone Clip.

On some phones you can also enable “Automatic Reconnection.” Refer to your mobile phone’s user guide for instructions on how to do this.

 **Tip!** In most instances, a headset symbol on the main screen of your mobile phone will confirm that you have successfully connected.

Using the Phone Clip

Managing calls with the call pick-up / hang-up button

Incoming calls:

To answer a call, press once.

To decline a call, double-click.

During a call:

To transfer a call started on your phone to the phone clip, press once.

To put a call on hold, press and hold for 2 seconds.

To make a call:

To redial the last number, double-click.

To activate voice dialing, press and hold for 2 seconds.

Using the Phone Clip as a remote control

When you’re not on the phone, the Phone Clip can also be used as a simple remote control for your sound processor(s).

Adjust the sound processor’s volume.

Press once to mute and unmute the sound processor’s microphones.

Press one or more times to toggle through the sound processor’s programs.

Pairing with your Baha Sound Processor

- 1 Switch off your Baha Sound Processor by opening the battery door.

- 2 Switch on your Phone Clip and remove the silver cap.

- 3 Press the white pairing button on the Phone Clip once using the tip of a pen or similar object.

- 4 The LED will flash yellow every two seconds and the Phone Clip will now be in pairing mode for 20 seconds.
- 5 While pairing mode is active, switch on your sound processor by closing the battery door.
- 6 Successful pairing will be indicated by an audible melody played in the sound processor.

Pairing with your mobile phone

- 1 Switch on your Phone Clip and remove the silver cap.
- 2 Make sure your mobile phone's Bluetooth® function is switched on. Refer to your mobile phone user guide or visit www.jabra.com for instructions.

- 3 Press the blue Bluetooth pairing button on the Phone Clip once to activate the pairing mode for 2 minutes. During pairing the LED will turn blue.

- 4 On your mobile phone search for new Bluetooth devices and select "Hearing Aid Phone" from the list.
- 5 If your mobile phone asks for a passcode, enter "0000" (four zeros).
- 6 Your Phone Clip is now paired with your mobile phone. If your mobile phone asks which Bluetooth service you wish to enable, select "Headset".
