Hear now. And always

Welcome to today's short passage.

Short Passage

Voice: Male

Several fish species, including catfish, bullheads, madtoms, smelt, ciscoes and whitefish, also have an adipose fin (the small fin on the back just in front of the tail).

That completes today's short passage. Call back tomorrow and listen to a new short passage.

Welcome to today's long passage.

Long Passage

Voice: Female, Accent

The simplest form of freshwater fishing is arguably pond fishing. The most common fish sought in ponds are what are broadly called sunfish. This includes a number of species: small pan fish that are easy to catch, the larger white and black crappie, and others. Larger ponds may also hold larger game fish, many of which are more commonly fished for in lakes. The difficulties encountered in pond fishing range from little to none (still fishing, easy to catch fish, few skills needed, great for teaching kids) to other kinds of fishing that is typically more challenging but can be just as fun.

Some people take a very low energy approach to pond fishing, and fishing in general. This form of fishing only requires some basic things - a cheap rod and reel, some earthworms, and a bobber. Once you have your hook baited and get your line in the water there is nothing to do but wait.

Lake fishing is one of the most popular forms of freshwater fishing. Lakes can have the sunfish one finds in ponds but can also contain more species such as largemouth bass, sturgeon, striped bass, and many others. The techniques used in ponds can and are used in lake fishing but there are additional techniques and equipment that come into play. The popularity of bass fishing has been a boon for fish equipment manufacturers and

Hear now. And always

helped spur the creation of a tremendous amount of tools, gadgets, lures, boats, and fishing "toys" you can use for fishing in a lake. While you can clearly expand your fishing options if you have a boat, in many lakes there are plenty of places where you can have a lot of success fishing from the shore.

Stream fishing is largely dominated by the allure and mystique of trout. They are wily, wary, and a lot of fun to catch. There has probably been more written about trout fishing than any other type of angling. There are other fish to be found in streams, with catfish being one of the most popular non-trout species.

Rivers can vary tremendously in size and the fish species they contain. One of the unique fishing opportunities they can offer are runs of spawning fish that only occur during a short period of time during each year. Also, like lakes, rivers offer different opportunities for those restricted to the shore versus those fishing from a boat.

That completes today's long passage. Call back tomorrow and listen to a new long passage.
