Solution Type:  Baha Connect  Baha Attract  Baha Start (Softband or SoundArc™)

### Snap Coupling

While the LowPro™ snap coupling may be sufficient for most patients, consider the 2mm extended snap coupling if additional clearance is required to enable optimal patient fitting and outcomes. Cochlear recommends the 2mm extended snap coupling for patients who received their Baha Connect System prior to 2014. If in doubt, a demonstration or evaluation with both options may assist with a determination.
