## 04 System Type

Select **one** option below.

### One sound processor systems

One Nucleus® 8 Sound Processor (CP1110) **SINGLN8**  
Complete form sections 05, 06, 07\*\*, 09, 10\*\*

One Kanso® 3 Sound Processor (CP1175) **SINGLK3**  
Complete form sections 05, 08, 09, 10\*\*

### Two sound processors systems

Two Nucleus 8 Sound Processors (CP1110) **DUALN8**  
Complete form sections 05, 06, 07\*\*, 09, 10\*\*

One Nucleus 8 Sound Processor (CP1110) plus  
one Kanso 3 Sound Processor (CP1175) **DUALN8**  
Complete form sections 05, 06, 07\*\*, 08, 09, 10\*\*

Two Kanso 3 Sound Processors (CP1175) **DUALK3**  
Complete form sections 05, 08, 09, 10\*\*

\*\* optional

The optional acoustic component of the external sound processor amplifies low frequency sound, and sends it into the ear canal. The acoustic component is intended to provide access to low frequency sounds for Nucleus cochlear implant recipients who have sufficient residual hearing. The acoustic component is indicated for Nucleus cochlear implant recipients with unaided air conduction thresholds less than or equal to 85 dB HL between 125 Hz and 2000 Hz following surgery. The acoustic component should only be used when behavioral audiometric thresholds can be obtained and the recipient can provide feedback regarding sound quality. Speech perception testing should be completed before and after fitting with the acoustic component to ensure that the recipient performs as well, if not better, with the acoustic component than without it. The Cochlear Nucleus Hybrid acoustic component is not compatible with the Kanso 3 Nexa Sound Processor.

## 08 Kanso® 3 Sound Processor for Nexa™ (CP1175) Kits

Your system kit also includes: **Kanso 3 Home Charger** P1434277, **Charger Plug Pack** P1533531, **SoftWear Pads** (five) P793408, **Cleaning Cloth** M470304, **Screwdriver and Cleaning Brush** P743009, **Microphone Covers** (two packs of two, default to color of primary sound processor: Black P1967084, Slate Grey P1967088, Silver P1967087, Sandy Blonde P1967086, or Chocolate Brown P1967085), **CP1150 Magnet Tool** (packed) P1434756, and **Socket Covers** (one set, default to color of primary sound processor: Black P1562184, Slate Grey P1562188, Silver P1562187, Sandy Blonde P1562186, or Chocolate Brown P1562185).

QTY

- ★ **Mini Microphone 2+ P770848**

- ★ **Phone Clip 94771**

- ★ **TV Streamer 94761**

# 10 Nucleus® Bimodal Solution

## Nucleus Bimodal Solution

Check this box if you are purchasing a ReSound hearing aid offered through Cochlear's Nucleus Bimodal Solution. Then fill out the Nucleus Bimodal Solution Order Form (FUN2947).§

### Policy:

Submission of this form by the centre referenced herein constitutes a prescription/order for the implant, including any and all related parts and accessories ("implant system"), or repairs thereto, that may be necessary to ensure proper working order over the life of the implant system. You should talk to your physician about who is a candidate for cochlear implantation, the associated risks and benefits, and CDC recommendations for vaccination. Cochlear implantation is a surgical procedure, and carries with it the risks typical for surgery. For additional information please refer to the Nucleus Package Insert available at [www.cochlear.com/us/nucleusindications](http://www.cochlear.com/us/nucleusindications)

1. Unopened Cochlear Implant (CI) systems can be returned within 60 days of the shipment date. Open CI systems cannot be returned. Individual system components cannot be returned.
2. Unopened CI system components can be exchanged within 90 days of the shipment date. Implants can be exchanged for the same generation technology up to 3 months prior to the expiration regardless of the shipment date. Open CI system components cannot be exchanged.
3. All exchange and return orders require a Return Merchandise Authorization (RMA). Please contact Customer Service to initiate an RMA.

\* Cochlear will facilitate a split shipment only if the purchasing entity has provided specific permission for split shipments.

☆ Battery life varies for every user, according to the age of the battery, the programs used each day, your implant type, the thickness of skin covering your implant, and the size and type of battery used. Streaming from compatible devices, True Wireless devices or FM may decrease sound processor battery life depending on how often and for how long streaming is engaged. Typical expected battery life is calculated using default map settings used with a CI1000 series implant. All day hearing is defined as 16 hours.

§ This form may be submitted along with a Nucleus System order or any time after a Nucleus recipient's initial activation. The Nucleus Bimodal Solution with ReSound hearing aids is available to recipients of the Nucleus Cochlear Implant System.
